
The Next Chapter in an Enduring Story
Introducing LoopID: A Digital Identity for a Lifetime of Adventure.
Group 7 - S4 IMBA
patagonia

Planet as Shareholder

Holdfast Collective

Planet is only shareholder

Anti-Fast Fashion

Durable, lasting apparel

Supply Chain Transparency

Farms, mills, factories mapped

Invests in sustainable materials & processes.

Worn Wear: Circular Economy

Repair & Resell

Extends product life

Revenue Generation

Complements new sales

Circular Model

Proven sustainable approach

Threats to Our Mission

Operational Bottleneck

The Worn Wear program's manual inspection process is slow and costly.

The External Threat

'Superfakes' are an important industry threat, eroding trust and value.

Unorganized Data

Valuable insights from materials, repairs, and resale are siloed and lost.

LoopID

Transforming a Garment into a Digital Asset.

The Anatomy of LoopID

Physical Layer (The Anchor)

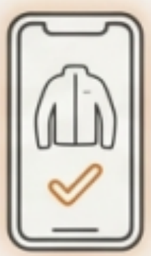

What you touch.

Data Layer (The Ledger)

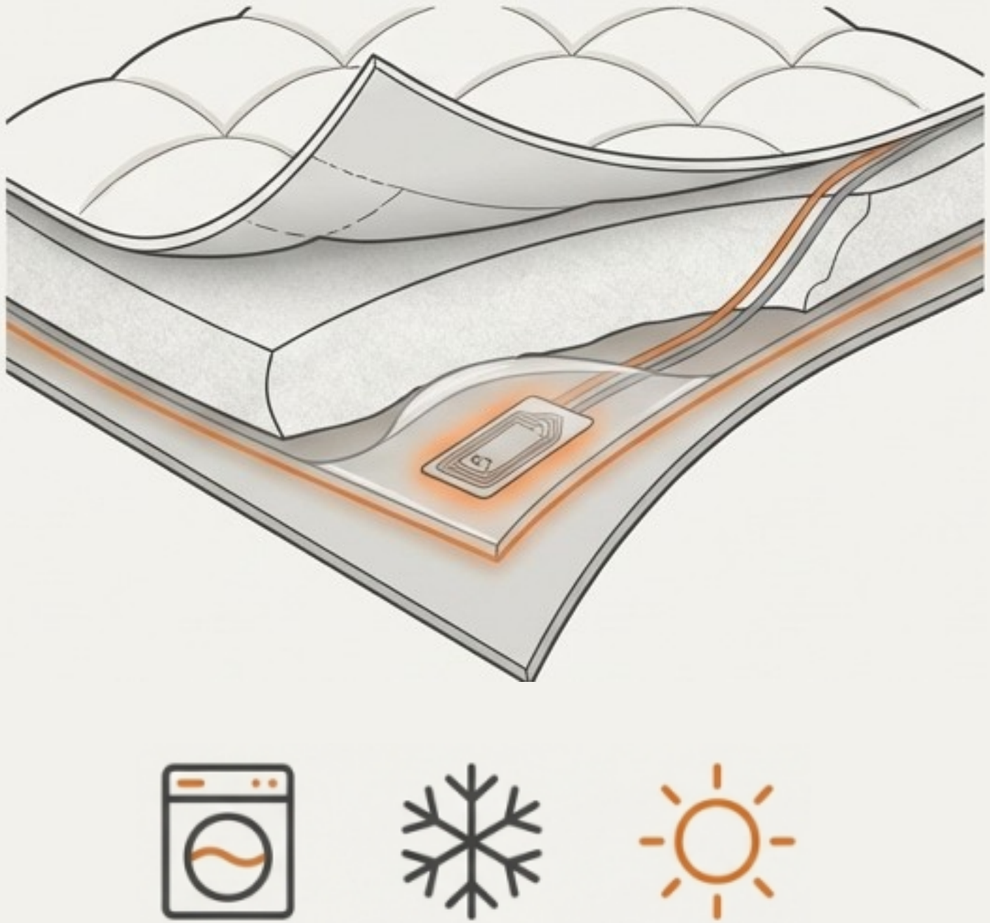

The **NFT (Digital Twin)** + History Log.
What proves it's real.

Experience Layer (The Portal)

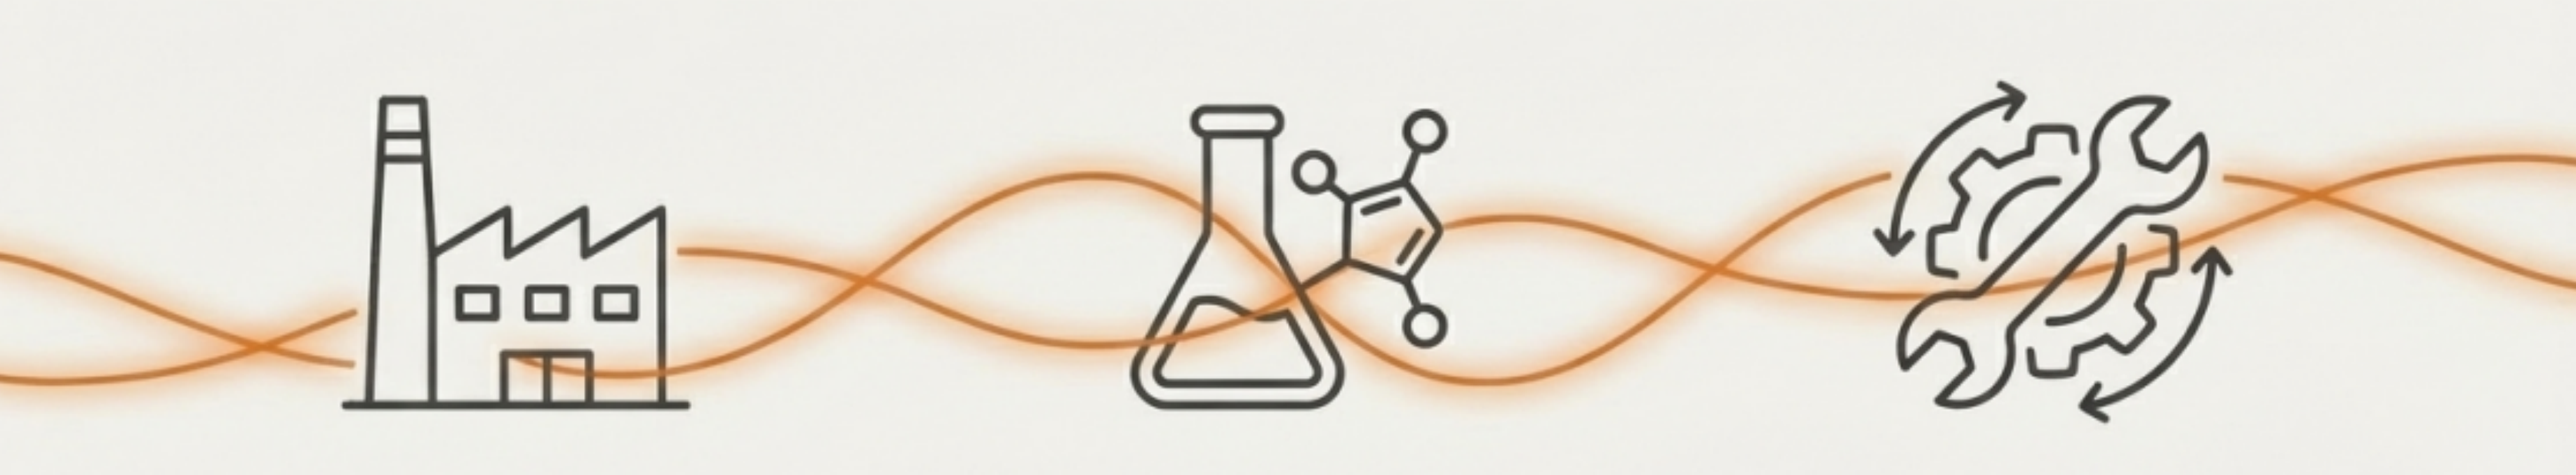

The App. Where you see the info.

Layer 1: The Physical Anchor

- Secure NFC Chip
- Encapsulated in industrial-grade materials
- Withstands decades of washing, temperature extremes, and wear
- Invisible to the user until needed

Layer 2: Digital Twin & Blockchain

Identity Data:
Model, manufacturing date, factory of origin.

Material Data:
Exact chemical composition for future recycling.

Lifecycle Data:
A living history of repairs and ownership changes.

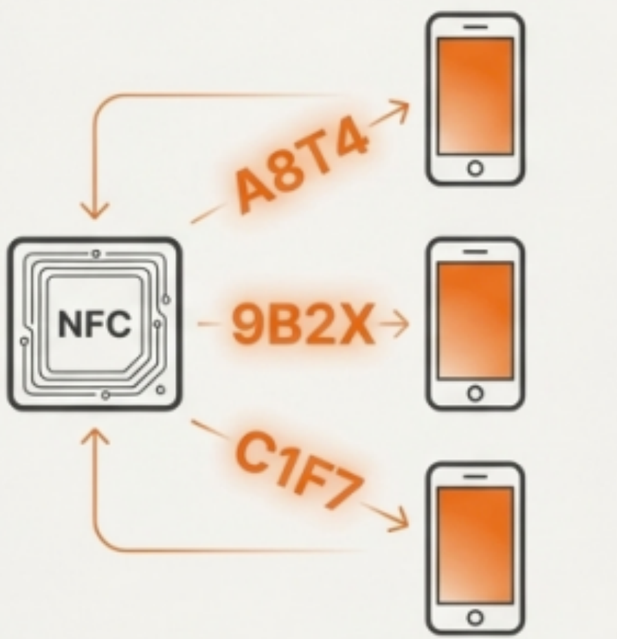

Layer 3: The Experience Portal

Instant Authentication • Automated Trade-In • The "Digital Patina"

Fortified by Design: Trust & Privacy

Anti-Cloning
(NFC NTAG 424 DNA)

User Privacy
(Zero-Knowledge Proofs)

User data stays on the user's device.

Our Phased Rollout

Year1
The Pilot (Test)

Launch on Nano Puff only. Test chip durability and core tech with partners EON and Avery Dennison.

Year2
The Integration (Connect)

Connect LoopID to Worn Wear centers. Enable 'Instant Trade-In' far customers.

Year3
The Scale (Expand)

Roll out to 100% of new products. Open the system to vintage gear.

The Viability: A Stronger, More Resilient Business

Operational Savings

15-20 Mins

Inter Regular, Granite Gray

<2 Mins

Inter Regular, Fitz Roy Orange

Drastic reduction in authentication and intake time for resale.

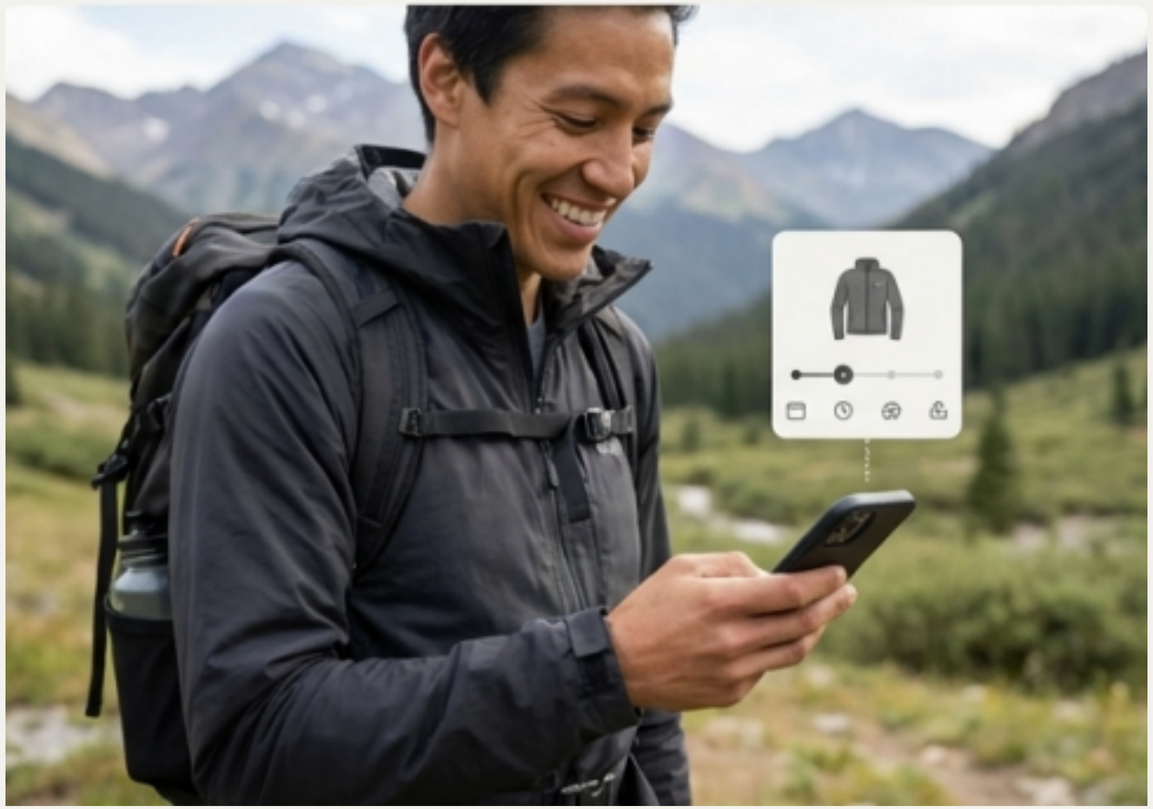

New Circular Revenue

Unlock new revenue from scaled resale and B2B data services.

Chip Cost: $0.45 - $0.90 per unit.

For Our Customers, For Our Teams

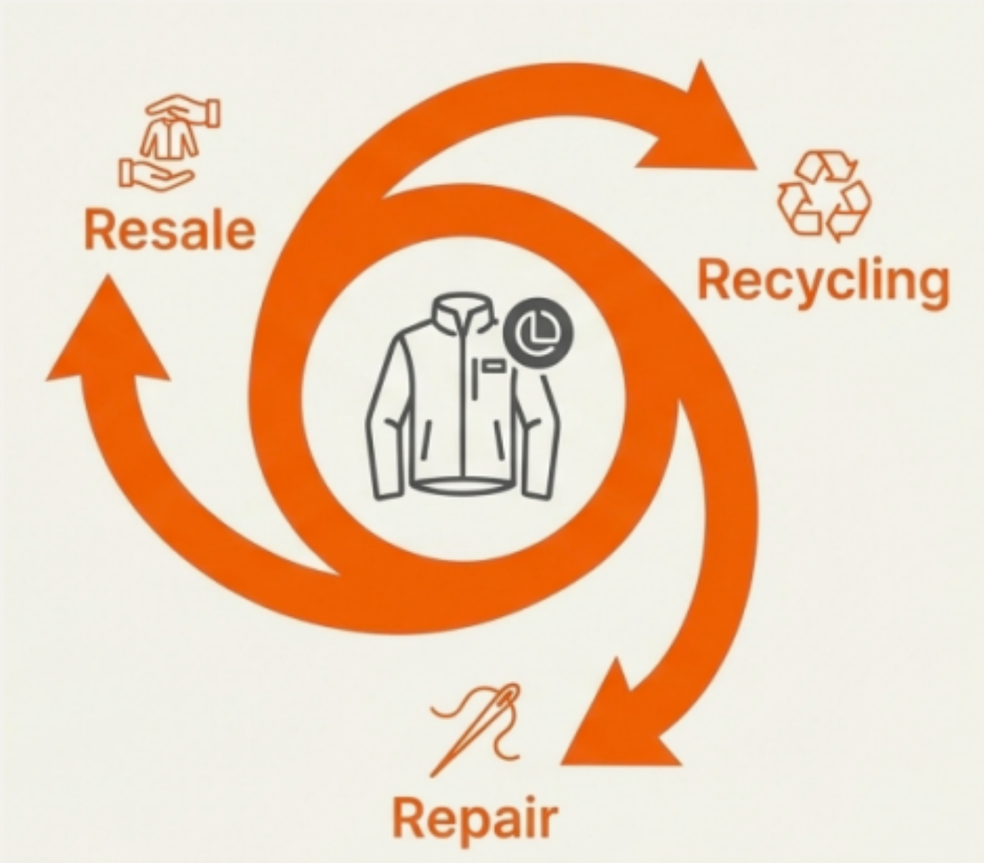

The **'Digital Patina'**,
One-Click **'Instant Resale'**

Live Data far **Better Design,**
Spotting Design Flaws Quickly
